

Capacitor Value Guide

0.022µf - Good all-rounder, bright and clean.
Used in many modern production instruments

0.047µf - More treble roll-off, with a warm and full tone especially with overdrive and gain

0.1µf - Used in 50s and early 60s instruments - Most high end roll off, can be "wah" like.

2 HUMBUCKERS + 1 SINGLE COIL

1 VOL / 2TONE / 5-WAY BLADE (DPDT MINI-TOGGLE SPLIT)
